GAIA®

MINDS THAT CREATE , HEARTS THAT TUFT

STERLING

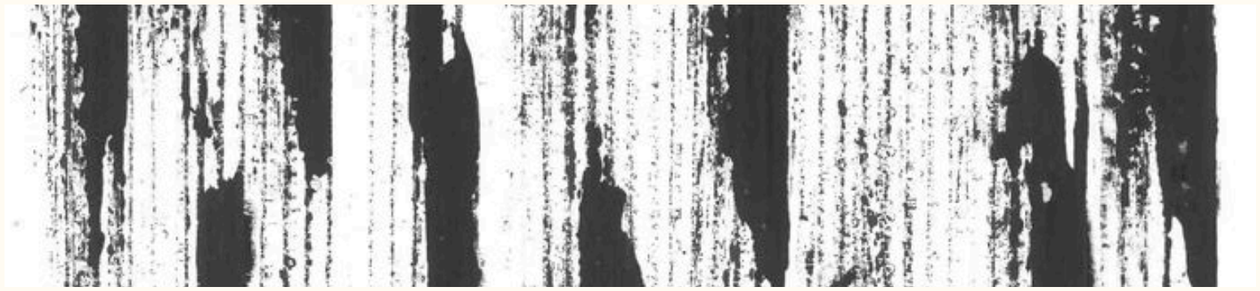

This collection translates invisible systems of movement and structure into tactile visual forms. Inspired by architectural grids, contour pathways, and woven textures, Sterling Carpet creates a sense of depth through layered directional strokes and modular repetition. The tonal blue palette enhances the feeling of calm precision and modern functionality.

STERLING

Sterling Carpet is inspired by invisible systems of movement, structure, and spatial organization found within urban environments and architectural layouts. The collection explores layered geometries, contour-like pathways, and woven linear textures to create a sense of rhythm, depth, and continuity. Through modular repetition and directional forms, the designs reflect the balance between order and movement present in contemporary interior spaces.

Inspired by architectural grids, mapping systems, and textile constructions, the collection combines geometric precision with organic textural expression. The overlapping forms and structured compositions create a refined visual language that feels modern, immersive, and sophisticated. Sterling Carpet transforms technical and spatial influences into tactile surface designs that reflect contemporary interior aesthetics.
